Function	What can we accomplish	Tag	Link
function-auto-ready	Automatically detect what resources are ready	essential, automation, readiness	[function-auto-ready](#)
function-go-templating	Use go-templating within Compositions	essential, templating, customization, flexibility	[function-go-templating](#) Docs: [text/template](#) [Sprig](#)
function-patch-and-transform	Use the deprecated patch-and-transform functionality to Input/Output variable from composite fields	optional, transformation, deprecated, data-manipulation	[function-patch-and-transform](#)
function-cel-filter	Only allow creation of resources that match a certain `cel` expression	conditionals, validation, filtering, compliance	[function-cel-filter](#)
function-switcher	Enable or disable creation of resources based on annotation	conditionals, control, annotation-based, toggle	[function-switcher](#)
function-dummy	Return a fixed response of your choice	troubleshoot, testing, fixed-response, simulation	[function-dummy](#)
function-debug	Print the data that's available to a function step at runtime	troubleshoot, debugging, introspection, visibility	[function-debug](#)

Function	What can we accomplish	Tag	Link
function-tag-manager	Easily add/modify tags on AWS resources without affecting pre-applied ones	ease-of-life, tagging, AWS-integration, metadata-management	function-tag-manager
function-status-transformer	Advanced modifications to `.status` field	status-modification, advanced, customization, state-management	function-status-transformer
function-shell	Run shell commands	scripting, shell, runtime-control, execution	function-shell
function-sequencer	Define sequence rules to delay the creation of resources until other resources are ready	orchestration, sequencing, dependency-control	function-sequencer
function-kcl	Write logic using KCL	scripting, KCL, logic, advanced-control	function-kcl
function-extra-resources	Retrieve cluster-scoped extra resources so that they can be used by other functions	resource-retrieval, shared-resources, reusability	function-extra-resources
function-environment-configs	Retrieve and merge EnvironmentConfigs into the Context	context-management, configuration, environment-setup	function-environment-configs
